

Aaron R. Williams is a senior data scientist in the Income and Benefits Policy Center at the Urban Institute, where he works on retirement policy, microsimulation models, data imputation, and data visualization. He has worked on Urban's Dynamic Simulation of Income (DYNASIM) microsimulation model, the Social Security Administration's Modeling Income in the Near Term (MINT) microsimulation model, and the Urban-Brookings Tax Policy Center's synthesis of IRS tax records. Williams teaches Introduction to Data Science in the McCourt School of Public Policy at Georgetown University and leads the Urban Institute's R Users Group.
