

Speaker Bio: Dr. Montgomery is a Research Assistant Professor in the Department of Biostatistics & Data Science at the University of Kansas Medical Center. His main collaborative research is with colleagues in weight loss and maintenance, Nephrology and Alzheimer's disease. His methodological research focuses on developing better methodologies to analyze data from early-stage trials, such as pilot and feasibility studies, especially with regards to how endpoints from these trials are used to justify proceeding to a larger trial. His current work on developing and extending existing methodologies for early-stage studies is funded by an R03 from the National Institute on Aging.
