

**Speaker Bio:** Scott Johnston is the drug overdose and substance use disorder epidemiologist for the State of Kansas. He monitors both fatal and non-fatal overdose data from a variety of data sources. He developed the Kansas Overdose Data to Action cluster/spike alerts for the state and provides reports to local health departments serving areas impacted. Scott graduated from the University of Kansas Medical Center Master of Public Health Program in May 2021 with a concentration in Epidemiology and started with KDHE shortly after graduation.
